

## Praying Faith Floating Phrases

N CL NG A ME SN OFIWENES CIWN EO TE O U KEELS

This is really weird! Looks like an alien from the planet Kepler 16b came along and zapped a bunch of the letters with anti-gravity particles on the bill board and they floated straight up. We need you to figure out which letters go in the open spaces. Look for the single letter columns, then go for the two or three letter words and determine which letters make reasonable words. Report your results to the technology personnel of your church.
